

Disclaimer: Handmade masks are not PPE. However, the [CDC has stated that they may be used when traditional masks are not available](#). Handmade masks cannot prevent you from contracting COVID-19, but they can mitigate droplet spread. Many hospitals are accepting donations of handmade masks for patients and providers who are not/are not treating COVID-19 or suspected COVID-19 patients, which frees up actual PPE for those most at risk of spreading or contracting the virus. In addition, hospitals have begun using homemade masks over N95 masks (which do protect from the virus) in order to extend their lives. Other hospitals are collecting handmade masks for use IF they begin to experience PPE shortages.

Thank you so much for your efforts to help our healthcare workforce as they battle COVID-19! In this document, you will find a list of facilities (mostly hospitals, but we are accepting requests from administrators at other facilities) that are currently accepting homemade mask donations. Our goal is to be in continuing contact with facilities, so we will update the list as needs change.

If you are a healthcare provider and would like your facility to be added to this list, please have a manager email we.need.handmade.masks@gmail.com from their work email address. Please include your facility name, address, phone number, whether or not you'd like the masks to be made from a specific pattern, about how many masks you need, and any delivery instructions.

We are a small team and are rolling out lists state-by-state. If you are interested in donating to a state not included below, please check back in a few days. If you would like to volunteer to call hospitals in states not included in this list, please also email we.need.handmade.masks@gmail.com. Put Volunteer Application: Your Name in the subject line. Please include a bit about yourself, your background and experience, and what state(s) you're interested in calling.

If you speak to someone at one of the hospitals on our list and they say that they are not taking homemade masks, please contact us at we.need.handmade.masks@gmail.com with the name and position of the person that you spoke to. We strive to speak with the highest-ranking person we can when we contact hospitals to ensure the accuracy of our information. However, during these turbulent times, information may not always reach everyone at a facility in a timely manner. We will happily follow up with facilities if donors are not receiving consistent information.

About

This list is being assembled by public health graduate students (and friends). We are contacting all hospitals and asking whether or not they are accepting donations of homemade masks. We are also adding those that post public requests for masks and non-hospital facilities whose administrators contact us and request to be added to the list. We will strive to continue to remain in contact with these facilities as needs evolve and update the list accordingly. If you do not see a facility in your area on our list, we recommend that you contact your local:

- Homeless shelters and other homeless outreach programs
- First responders
- Nursing homes and assisted living facilities

[BACK TO LIST OF STATES](#)

- Free-standing emergency rooms
- Other medical clinics

The list is broken down by state. Next to your state's name, we specify whether the list consists only of facility submissions or also includes our phone survey of hospitals. **Please check whether your desired facility has requested a specific pattern.** If not, here are some common patterns other facilities are requesting: adult mask ([example 1](#), [example 2](#), [example 3](#), [example 4](#), [example 5](#), [example 6](#)), and child mask ([example 1](#), [example 2](#)).

Also, some are requesting masks with replaceable filters: [example](#). If making masks with elastic, be sure to use latex-free elastic.
